SUPPLEMENT TO  
REPORT NO.

25X1

THIS IS UNEVALUATED INFORMATION

1. The Doudlevce plant of the Skoda Works in Pilsen\* employs about 4,000 workers. Of these about 80 percent are members of the Communist Party, but only about 10 percent are convinced Communists. Production includes all types of electric motors, transformers, dynamos, turbogenerators, switchboards, batteries and trackless trolleys. Steel and copper for use in the production of these items are supplied by Sweden, aluminum by the USSR and electric insulators by Germany.
2. Leading personnel of the plant include:

Manager:	Reitmayer, a Russian national.
Plant Engineer:	Stastny.
Commander of the Plant Militia:	Prajs. The militia consists of 80 workers armed with sub-machine guns and rifles.
Commander of the Plant Security Police:	Jelinek. The guards are armed with CZ pistols of 7.65 mm. caliber.
Chairman of the Plant KSC:	Nemecek.
Chairman of the Workers' Council:	Janousek.
Chairman of the Cadre Commission:	Strnad. Members of this commission include Preis, Suchy and Iron.
3. In 1948 a 25 story building was started on the plant grounds. It is expected that it will be used as an administration building. On a small hill just west of the plant near the Pilsen-Doudlevce railroad station a building covering an area as large as that of the entire Doudlevce plant is being built. It is

in three sections and a part of it is underground and connected with the Doudlevce plant by a railroad tunnel. Machinery is now being installed in this building. The new plant will probably produce turbines and turbogenerators.\*\* Testing stands for turbogenerators have been installed underground.
